

## Como crea un back up una base de datos tiene esta en full

Restore para recupera la data

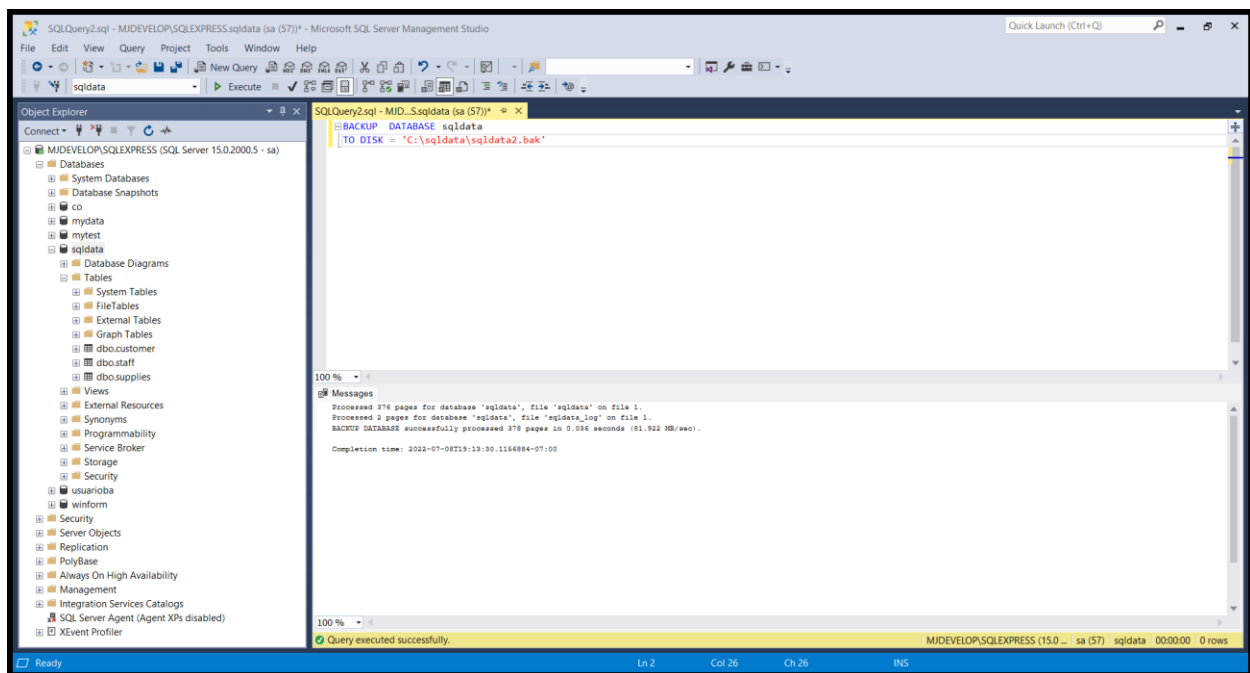

Close existing connections to destination database in single user – mode

Ok all data

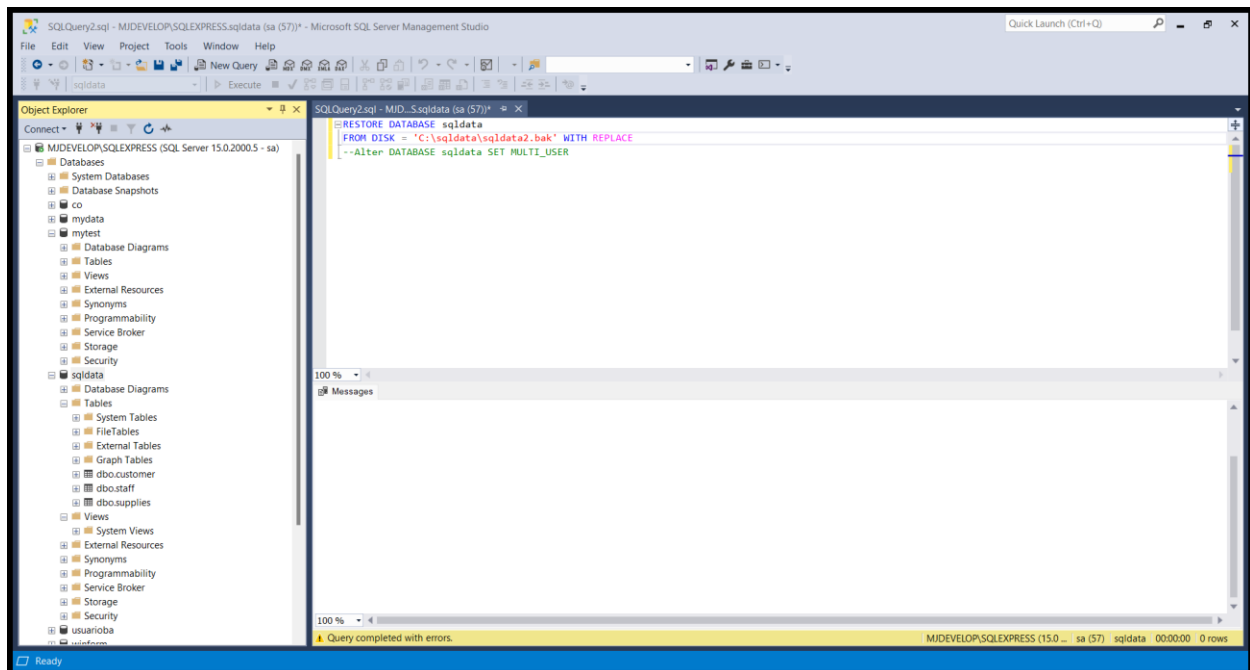

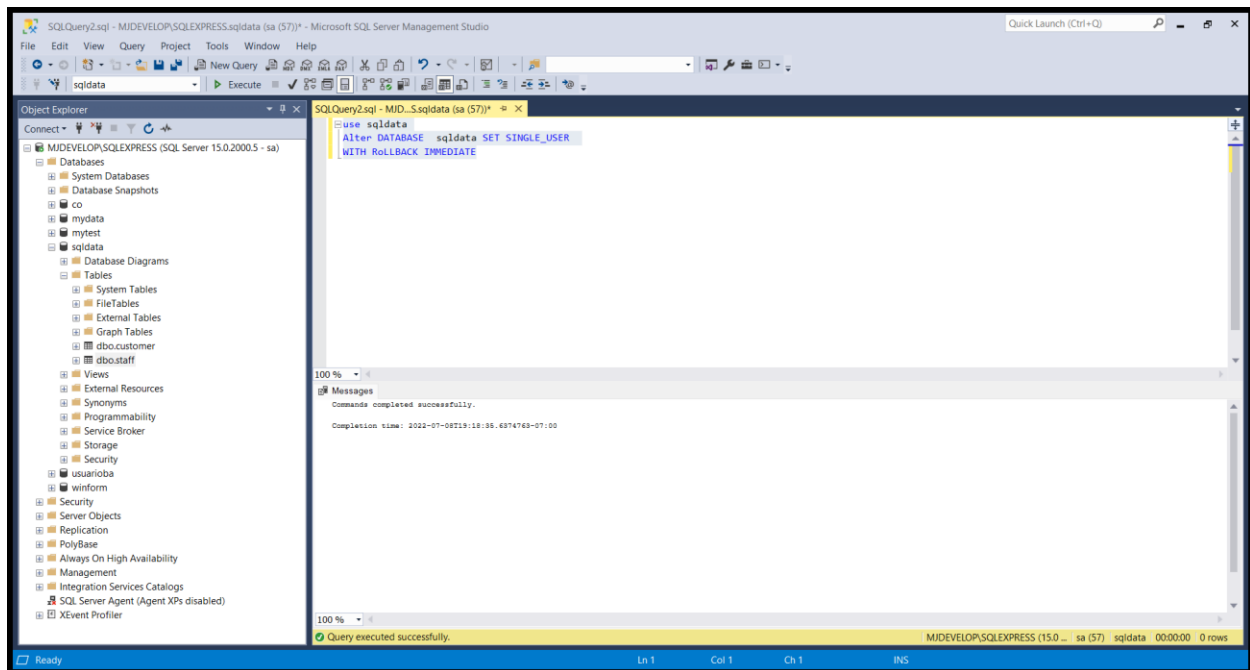

Sql command manual

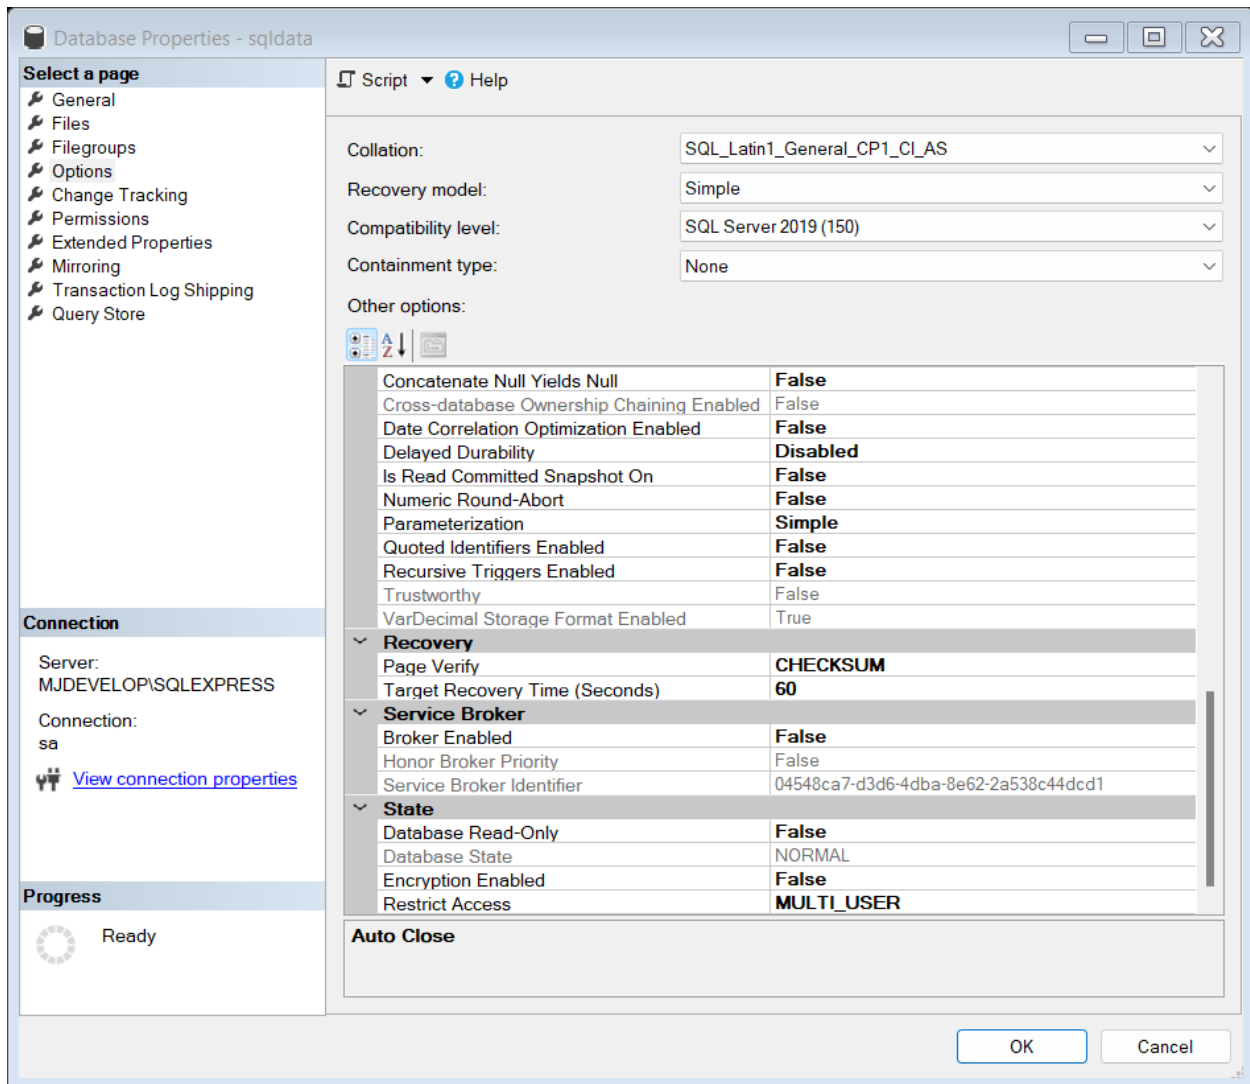

use sqldata

Alter DATABASE sqldata SET SINGLE\_USER

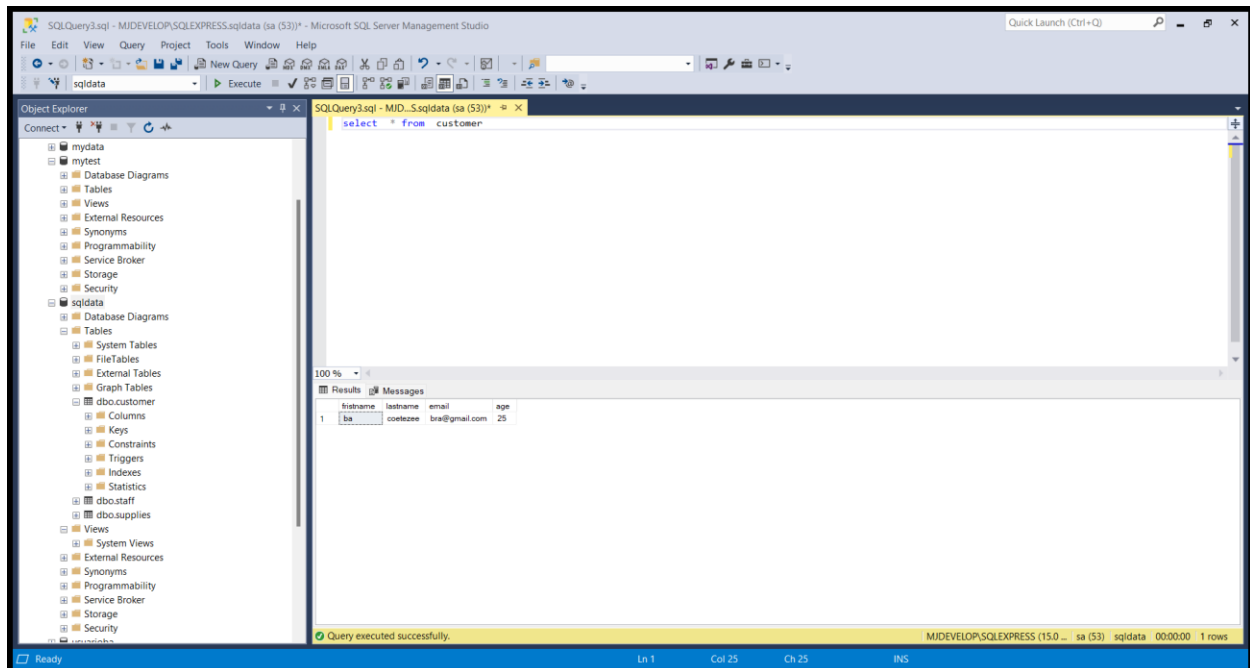

WITH ROLLBACK IMMEDIATE

El comando no funciona pero la forma automatica si funciona

Select query

SQLQuery3.sql - MIDVELOP\SQLEXPRESS.sqldata (sa (53)) - Microsoft SQL Server Management Studio

File Edit View Query Project Tools Window Help
